You further acknowledge that:

(1) The internship is for your benefit to receive training and mentoring, and to provide valuable experience for future job Selection, application, and performance in the field of Data Science. (2) you agree to work under the close observation of mentors at the Company;

About Project:- Consider the analysis of the air quality index as a criterion ranging from 0 to 500. The higher the value of AQI, the higher the level of air pollution and the problem of air quality. If AQI values of 50 or less represent good air quality, while AQI values greater than 300 represent unsafe air quality.

Task :- You can analyze the Air Quality Index.
